Naval Research Logistics

Contents

Volume 36, 1989

Issue 1, February 1989

Risk Pooling in a Two-Period, Two-Echelon Inventory Stocking and Allocation Problem
Peter L. Jackson and John A. Muckstadt 1

An Interactive Optimization System for Bulk-Cargo Ship Scheduling
Marshall L. Fisher and Moshe B. Rosenwein 27

Optimal Layered Search
J. R. Weisinger and S. J. Benkoski 43

Component Commonality in Assemble-To-Order System: Models and Properties
Yigal Gerchak and Mordechai Henig 61

Analysis of Project Scheduling Strategies in a Client-Contractor Environment
Joshua B. Levy and Giri Kumar Tayi 69

Discount Pricing Policies for Inventories Subject to Declining Demand
Amiya K. Chakravarty and G. E. Martin 89

On Partial Orderings of Life Distributions
Harshinder Singh 103

The Threshold Policy on the *M/G/1* Queue with Server Vacations
Offer Kella 111

Issue 2, April 1989

Aircraft Sortie Effectiveness Model
Boghos D. Sizvazlian 127

A Model for Critical Crack Size Estimation in Failure of Gun Barrels
W. J. Padgett and S. D. Durham 139

Algorithms for the Design of Finite-Capacity Service Units
S. Chakravarthy and Marcel F. Neuts 147

Should We Be Using Cost of Capital in Calculating Holding Costs of Consumable Inventory?
Bruce P. Christensen and Mark A. Fryman 167

An Approximation to the Stationary Distribution of a Multiechelon Repairable-Item Inventory System with Finite Sources and Repair Channels
S. Christian Albright 179

Estimation for Dirichlet Mixed Models
Steve Leeds and Alan E. Gelfand 197

Application of Dirichlet Integrals for Curtailment Problems in Sampling Inspection
Milton Sobel, M. Ebneshahrashoob, and J. Y. Lin 215

Issue 3, June 1989

Continuous-Time Markov Duels: Theory and Application
C. Bernard Barfoot 243

Transient Analysis of Multiple-Unit Reliability Systems
O. P. Sharma, N. Ravichandran, and J. Dass 255

Interrelationships between Performance Measures for the Machine-Repairman Problem
Saligrama R. Agnihothri 265

Open-shop Scheduling Problems with Dominated Machines
I. Adiri and N. Aizikowitz (Hefetz) 273

Application of Generalized Benders Decomposition to a Nonlinear Distribution System Design Problem
Sangwon Moon 283

On the Number of Games Played in a Best of $(2n - 1)$ Series
H. N. Nagaraja and W. T. Chan 297

A Modified GUB Algorithm for Solving Linear Minimax Problems
Takahito Kuno, Kouji Mori, and Hiroshi Konno 311

Interactive Multicriteria Linear Programming: An Extension of the Method of Zionts and Wallenius
R. Ramesh, Mark H. Karwan, and Stanley Zionts 321

Approximate Semieconomic Design of Control Charts with Multiple Control Limits
George Tagaras and Hau L. Lee 337

Issue 4, August 1989

Identifying and Ranking a Most Preferred Subset of Alternatives in the Presence of Multiple Criteria
M. Murat Köksalan 359

An Operational Analysis of System Calibration
Donald P. Gaver and Hasan B. Mutlu 373

Excess Games
Alan Washburn 383

Chebyshev Subinterval Polynomial Approximations for Continuous Distribution Functions
Hsien-Tang Tsai and Herbert Moskowitz 389

The Inventory Packing Problem
Nicholas G. Hall 399

A Survey of Preventive Maintenance Models for Stochastically Deteriorating Single-Unit Systems
Ciriaco Valdez-Flores and Richard M. Feldman 419

On the Robustness of the Modified Beta Distribution for Acceptance Sampling in Statistical Quality Control
Hau L. Lee and George Tagaras 447

Estimating the Lead-Time Demand Distribution for an Autocorrelated Demand by the Pearson System and a Normal Approximation
Bong-Geun An, Stergios B. Fotopoulos, and Min-Chiang Wang 463

A One-Dimensional Helicopter-Submarine Game
V. J. Baston and F. A. Bostock 479

A Model for Use in the Rationing of Inventory during Lead Time
Hugh C. Haynsworth and Barbara A. Price 491

A Deterministic Lot-Size Inventory Model with Shortages and a Linear Trend in Demand
Upendra Dave 507

A Nonlinear Approach to the Multiorigin, Multidestination Fleet Deployment Problem
Nikiforos A. Papadakis and Anastassios N. Perakis 515

Forthcoming Articles 529

Issue 5, October 1989

Cost Realism in Defense Contracting
K. T. Wallenius and N. K. Womer 533

Estimation and Prediction in a Semi-Markov Model for Evasive Vehicle Movement along a Fixed Path
Danny W. Turner, Virgil R. Marco, and Dean M. Young 559

Asymptotic Results in Search Theory
Ira Moskowitz and Jeff Simmen 577

Optimal Search Plan Minimizing the Expected Risk of the Search for a Target with Conditionally Deterministic Motion
Kōji Iida 597

Lot Sizes under Continuous Demand: The Backorder Case
David Yao and Morton Klein 615

Incorporating Redundancy Considerations into Stockage Models
Alan J. Kaplan 625

Power Approximations in the Economic Design of Control Charts
George Tagaras 639

A Theoretical Justification for an Increasing Average Failure Rate Strength Distribution in Fibrous Composites
S. D. Durham, J. D. Lynch, and W. J. Padgett 655

Single-Machine Scheduling to Minimize Absolute Deviation of Completion Times from a Common Due Date
Wlodzimierz Szwarc 663

Determining Restrictive Goals in Linear Goal Programs
Philip O. Beck and Gary Klein 675

The Optimal Linear Combination of Control Variates in the Presence of Asymptotically Negligible Bias
Peter W. Glynn and Donald L. Iglehart 683

Estimating a Survival Curve When New Is Better Than Used in Expectation
Lyn R. Whitaker and Francisco J. Samaniego 693

Facility Location on a Grid with a Diagonal Line
Enrique R. Venta and Francis J. Nourie 709

Issue 6, December 1989

Some Two-on-Two Homogeneous Stochastic Combats
A. V. Gafarian and K. R. Manion 721

Assessment of Machine Tool Reliability Using a Proportional Hazards Model
Thomas A. Mazzuchi and Refik Soyer 765

Optimal Design of Accelerated Life Tests under Periodic Inspection
Bong-Jin Yum and Seung-Cheol Choi 779

Level Crossing Analysis of Priority Queues and a Conservation Identity for Vacation Models
J. George Shanthikumar 797

Optimal Arrangement of Components via Pairwise Rearrangements
Philip J. Boland, Frank Proschan, and Y. L. Tong 807

Principal-Agent Maintenance Problem
I. Krinsky and A. Mehrez 817

Monte Carlo Estimation of the Maximal Flow Distribution with Discrete Stochastic Arc Capacity Levels
George S. Fishman 829
